

MAG 300

Precision Caliber 12" Magnetic Flow Meter

Features

- +/- 0.5% accuracy
- No moving parts
- Measures flow from 600 gpm to 11,700 gpm
- Mounted on a galvanized skid
- Provides digital contacts to start or stop various equipment or trigger telemetry.
- Plug and play connectors allow for fast and easy set-up
- Nema 4X enclosure for outdoor use
- Inlet and outlet straightener spool pieces provided for accuracy.

Technical

- Maximum working pressure is 200 psi
- Power consumption is 24 watts at 120 VAC
- Temperature range is 32°F to 158°F
- Outputs: Two digital relays
 - One analog 4~20 mA output (HART signal)
 - One pulse output
- Start/stop controls and dry contact alarms for two pumps
- 97 Series Amphenol connectors for inputs and outputs
- EPDM liner bonded inside flow tube
- Dimensions: 48" wide x 108" long x 36" tall
- Weight: 1,500 lbs
