

21,000 GALLON WORKSAFE™ STEEL BI-LEVEL TANK

Features

- Unique safety stairway
- Totally enclosed tank
- Quick Kleen "V" shaped floor with two 4" valves at floor level
- Easy to move
- Optional vapor tight features and liquid level gauge
- Optional steam coils

Technical

WORKSAFE™ Bi-Level steel tanks are available with or without an epoxy coated interior. This tank has a "V" shaped Quick Kleen floor which allows any residual fluid in the tank to be easily flushed out the floor level 4" valves. Staircase guard rails and three 22" confined space entry hatches are standard equipment. Optional epoxy coatings offer increased chemical resistance and higher degree of cleanliness for sensitive environmental applications. (Chemical resistance charts are available.) High strength steel walls hold fluids up to 16 pounds per gallon.

Material Specifications

Steel construction, totally enclosed, and optional internal two part epoxy coating. Two 4" butterfly valves with Buna seals standard located at either end of the "V" shaped floor. Permanently attached axles for maximum maneuverability. Staircase attached to the front and a collapsible guard rail system on the roof of the tank. Optional level gauge. Vacuum pressure relief valve standard. Optional vapor recovery fitting. Three 22" vapor tight access hatches. Other gasket materials needs available to match your application.
